

BEEKEEPER

**For increased yields and enhanced fruit set on various
pollination susceptible crops**

BeeKeeper is Australian made for
Australian bees on Australian farms.

BeeKeeper induces bees to boost their
instinctive feeding behaviour.

BeeKeeper unlike other inferior bee
attractants, contains no sugars or honey
which can distract the bees from the
pollen.

BeeKeeper contains no pathogenic
organisms. **BeeKeeper** encourages bees
to pollinate a greater number of flowers
and lures bees to the area, consequently
enhancing pollination.

Amgrow Australia Pty Ltd

BeeKeeper

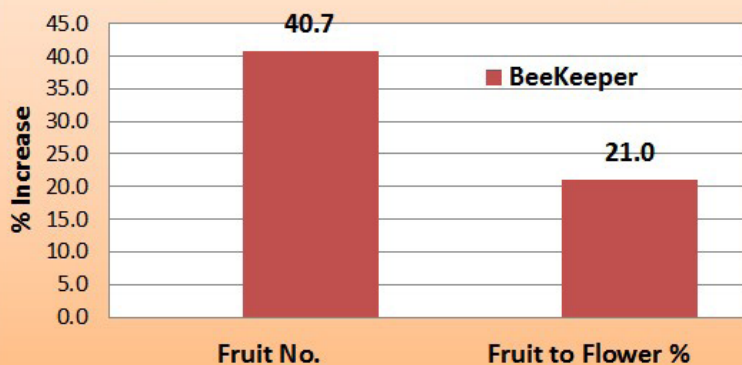

BeeKeeper is ph balanced and copies the natural honey bee pheromone that bees use to mark their food supply.

Indepandant trials conducted on avocado, strawberry and cucumber confirmed **BeeKeeper's** ability to increase fruit set and total fruit numbers.

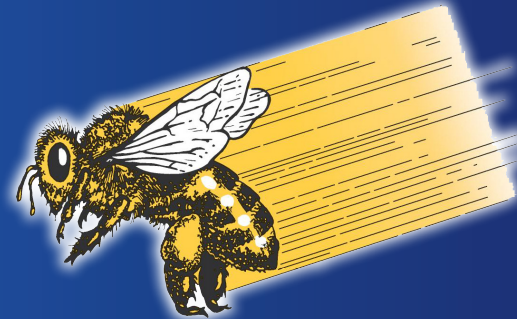

BeeKeeper on Sharwill Avocado (% Increase Above Control)

BeeKeeper on Festival Strawberry (% Increase Above Control)

BeeKeeper on Cucumber % Fruit Set

PACK SIZE: 10 Litres
