PRODUCT	NAME	CODE	SHIPPER	DESCRIPTION
	Easy Set Mouse Trap	70300 - 2PK 70301 - 4PK	36 18	Superior Quality and effectiveness. Large pre baited, strawberry scented plastic cheese pedal. Can be used anywhere in the home.
	Easy Set Rat Trap	70305 - 1PK	12	Superior quality and effectiveness. Large pre baited, strawberry scented plastic cheese pedal. Can be used anywhere in the home.
	Quick Kill Mouse Trap	70310 - 2PK	6	Quick & easy. Highly effective and made of durable plastic. Kills quickly and humanely. Covered bait trough eliminates bait theft. Use indoors or out.
	Clean Kill Mouse Trap	70312 - 2 PK	6	Perfect placement for quick, humane kill. Bait door eliminates possibility of bait theft. Narrow profile enables ideal placement. Covered trap for a no-see, no-touch experience.
	Kill & Seal Hygenic Mouse Trap	70313 - 2 PK	6	Seals in dead mouse, parasites, fluids and odours. Recommended for use around children and pets. No-touch, no-see, no-cleanup experience. Fully disposable.
	Electronic Mouse Trap	70334	4	Uses a high voltage, quick and humane shock that kills mice in seconds. Ideal for use around children and pets. Highly economical, kills 100 mice per set of batteries.
	Electronic Rat Trap	70331	4	High voltage shock kills rats. Kills 1 rat per setting. Kills 50 rats per set of batteries. Easy-to-use: Bait, place, turn on and empty. No-touch, no-see experience.
	Multikill Electronic Mouse Trap	70332	6	Eliminates rodent problems quickly and easily. Quick humane kill of mice. Highly economical, kills 10 mice per setting, 150 mice per set of batteries. 100% kill rate.
	Mini Pro Pest Chaser	70322	6	Ideal for average-size areas like garages, sheds etc. Mini size, industrial design. High frequency ultrasound repels mice and rats. Sound is inaudible to people and non-rodent pets. Red LED light shows unit is functioning properly.
	Heavy Duty Pest Chaser	70321	4	Ideal for large-size areas like garages, sheds etc. Sound is inaudible to humans and non-rodent pets. High frequency ultrasound repels mice and rats. 6 ft cord enables ideal placement.
	Tin Cat Mouse Trap	70335	6	Transparent lid for easy viewing. For catching and releasing mice. Humane method of mouse control. Catches up to 30 mice per setting.

VICTOR

Victor® Electronic Rat Trap

Features:

- Kills 50 rats per each set of 4C batteries
- High voltage shock kills rats and mice in seconds
- Easy to use – simply bait, turn on, & empty
- Patented design prevents escapes
- Smart circuit technology senses rodent to trigger electronic shock
- Auto reset allows trap to always be ready to kill
- Non-toxic, poison free

About:

The Victor® Electronic Rat Trap is equipped with advanced smart circuit technology that senses when a rodent enters the trap. Once the rodent is inside, the rat steps onto the metal plates, completing the circuit and the trap delivers a quick, humane 7,000 volt shock to kill the rat. Since rats have the ability to restart their hearts, the shock is applied for 2 minutes ensuring a high kill rate. Each time the trap catches a rat, the light on top of the trap flashes green for up to 24 hours to indicate a kill. If the batteries are low or need to be replaced, a red light will blink. To dispose of the rat, just dump the rodent directly into the trash for a hygienic and safe, no-touch, no-see disposal. The trap can either be reset or discarded. To reset, re-bait, place and turn on the trap for continued rodent control. Should an unlikely escape occur, the trap will reset itself. The trap can kill up to 50 rats per set of four "C" batteries.

Victor® Multi-Kill™ Electronic Mouse Trap

Features:

- Humane, high voltage shock kills mice in seconds
- Kills 10 mice per setting
- Kills 150 mice per set of batteries
- 100% kill rate
- No-touch, no-see experience
- Shock N' Drop Chamber rotates to drop mice into Collection Drawer
- Collection Drawer holds 10 mice
- Easy to use – simply bait, turn on, & empty
- Built-in safety switch and tunnel design protects kids and pets
- Non-toxic, poison free

About:

The Victor® Multi-Kill™ Mouse Trap is equipped with two points of entry located on the back of the trap. The staircase design leads the mouse into the Shock N' Drop Chamber where the bait is located. Once the rodent is inside, the patented tunnel design and beveled columns hold the mouse in place and prevent any escapes. To reach the bait, the mouse must step onto the metal plates, completing the circuit and initiating a quick, humane shock killing the mouse in less than 3 seconds. After the mouse is killed, the Shock N' Drop Chamber automatically rotates and deposits the mouse into the collection drawer. The Victor® Multi-Kill™ Mouse Trap automatically resets. The light located above the power switch will blink green for up to seven days to indicate a kill, a yellow light when the collection drawer is full and a red light when the trap is low on batteries. To dispose of the mice, slide open the collection drawer and dump the mouse directly into the trash for a hygienic and safe, no-touch, no-view disposal. The trap can kill up to 10 mice per setting and 150 mice per set of four "C" batteries.
