PROLIFIC COMPOUND FERTILISER RANGE

Prolific Blue AN is suitable as a pre plant or directed side dress fertiliser in a wide range of crops including sugarcane, vegetables and tree crops.

Prolific Horti Special K has the perfect analysis for bananas with 20% potassium and can be used as a directed side dress for crops such as potatoes.

Prolific Compound Fertilisers

The **Prolific range** of fertilisers are high quality, compound fertiliser designed for dry spreading application. **Prolific fertilisers** supply the nutrient requirements for many horticultural crops, including vegetables, fruits, vines, flowers, turf and ornamentals.

Prolific fertilisers are suitable for pre plant, planting and side dressing applications.

The **Prolific range** guarantee even distribution of nutrients for access by plant roots. This means that each plant receives the same amount of NPK and trace elements resulting in uniform growth.

Typical Analysis		
Guaranteed Minimum Analysis	Prolific Blue AN	Horti Special K
NITROGEN (N)	12%	10%
PHOSPHORUS (P)	5.2%	2.2%
POTASSIUM (K)	14.1%	20%
SULPHUR	6%	11%
CALCIUM	1.5%	0%
MAGNESIUM	1.2%	0%
ZINC	0.01%	0.25%
BORON	0.02%	0.1%
IRON	0.05%	0%
COPPER	0%	0%
