PRODUCT INFORMATION SHEET

BattleaxePRO

*Active Constituents: 20g/kg propoxur, 2g/kg tetramethrin,
10g/kg piperonyl butoxide
Insecticide Poison Schedule 5*

BattleaxePRO is an aerosol formulation containing both long lasting and vapour-acting knockdown components. It can be fitted with a nozzle extension to allow treatment of cracks and crevices, effectively flushing out any hidden insects. BattleaxePRO is used for control of bed bugs, cockroaches, ants, spiders, flies and other insect pests as specified on the label.

Benefits:

- 360 degree valve allowing the pack to be sprayed at any angle
- Long residual activity
- CFC free
- No oily residue
- Low poison schedule making it suitable for restaurants, hotels factories etc
- Suitable for European wasp

Pack Size:

Available in 420g

BattleaxePRO

Directions for Application (Refer to product label for more detailed instructions)

PEST	STATE	CRITICAL COMMENTS
Bed bugs	All states	Lightly spray mattresses, bed frames and skirting boards
Ants		Spray around and in garbage bins, food disposal areas, sills and other points of entry
Spiders		Spray eaves, webs and other sites where spiders lurk
Flies, mosquitoes		Spray surfaces where flies and mosquitoes settle. For outdoor fly control, spray garbage bins and around unit incinerators and barbecues.
Silverfish		Spray around bookshelves, drawers, along skirting boards and architraves.
Clothes moths, carpet beetles		Spray clothes storage areas. Lightly spray carpets particularly in areas of little or no traffic.
Cockroaches		Spray skirting boards, cupboards, drawers, behind and under stoves and other kitchen appliances. Use extension tube to direct spray into cracks, crevices and other hard to reach places.
Millipedes, earwigs		Thoroughly spray surfaces where they are found or where they enter homes
Slaters (woodlice, common pillbug)		Spray surfaces where they are found or where they enter homes
European wasp	NSW, VIC, TAS, SA, WA	Use for accessible nests. Spray after dark and wear insect proof clothing to avoid being stung. Spray in and around nest entrances until the nest is saturated. Spray again 3 days later then destroy the nest.
