METALAXYL
Fungicide Granules

ACTIVE CONSTITUENT: 50 g/kg METALAXYL

GROUP 4 FUNGICIDE

For control of phytophthora root rot of avocados, phytophthora root rot and trunk canker of macadamia nuts, phytophthora trunk rot of peaches, damping off of certain vegetable crops as specified in the Directions for Use.

APPLICATION FOR USE:

Phytophthora Root Rot
- apply at planting and repeat 8 to 12 weeks later until trees have recovered.
- Use as a soil application at the beginning of Summer wet season and again 8 to 12 weeks later. To ensure the fungicide is carried into the root zone of the tree, apply when rain is imminent or use irrigation.
- Apply further treatment of Barmac Metalaxyl Systemic Fungicide Granules. In WA for dryland avocado crops apply at the beginning of the Summer wet season and again 8 to 12 weeks later. To ensure the fungicide is carried into the root zone of the tree, apply when rain is imminent or use irrigation.

Dryland Avocado Crops
- Apply at planting and repeat 8 to 12 weeks later. Also, apply in the Autumn and again in the Spring and repeat the application at 8 to 12 week intervals until trees have recovered.

Cultivation or watering. DO NOT use on unsterilised potting soil in avocado nurseries.

Phytophthora Stem and Trunk Canker
- Use as a soil application at the beginning of Summer wet season and again 8 to 12 weeks later. To ensure the fungicide is carried into the root zone of the tree, apply when rain is imminent or use irrigation. Apply further treatment of Barmac Metalaxyl Systemic Fungicide Granules.

Phytophthora Root Rot
- For control of Phytophthora root rot in older orchards 6 to 8 years or older.
- For use in WA for dryland avocado crops apply at the beginning of Summer wet season and again 8 to 12 weeks later. To ensure the fungicide is carried into the root zone of the tree, apply when rain is imminent or use irrigation.

Phytophthora Trunk Rot of Peaches
- For control of Phytophthora trunk rot of peaches, apply at the beginning of Summer wet season and again 8 to 12 weeks later. To ensure the fungicide is carried into the root zone of the tree, apply when rain is imminent or use irrigation.

Phytophthora Damping Off of Certain Vegetable Crops
- Apply at planting and repeat 8 to 12 weeks later. Also, apply in the Autumn and again in the Spring and repeat the application at 8 to 12 week intervals until trees have recovered.
