## Sundew Flea Control

**Active:** 0.25g/kg imidacloprid

Sundew Flea Control is a unique and effective flea treatment and home deodoriser. Unlike other flea treatments Sundew Flea Control is safe for your dogs, cats, rabbits and other warm blooded pets and is recommended by veterinarians.

Fleas spend 95% of their time in the environment and not on your pets, so treating the source (your furnishings), will ensure better protection for your pets and your family.

Sundew Flea Control is fast acting killing 90% of fleas within the first 2 hours and 100% within 4 hours.

One application will give up to 30 days of flea protection.
