PROFESSIONAL
TURF MANAGEMENT PRODUCTS
FOR THE HOME LAWN ENTHUSIAST

THE LAWNPORN STORY

Lawnporn started as a Facebook page in 2016, by Whyalla (Adelaide) resident Matthew Daum as a page devoted to lawn and lawn care tips.

With the major employer in Matt's home town facing closure, he created the Grass-Off Competition on the Lawnporn Facebook page to engage and cheer up the community.

The competition went viral and the Grass-Off winner was announced to 22,000 devoted followers of the page in February 2017.

Lawnporn appeared on Channel 7 Sunrise soon after and the page continued to grow. Followers demanded merchandise, advice and professional turf management products for their home lawns.

It was at this time that Lawnporn's vision was formed, to deliver professional-grade products to home lawn enthusiasts in pack sizes economical for the home owner. Partnering with leading Australian manufacturers to develop a product range, Lawnporn initially commenced selling their products online, but due to follower demand the aim to have the Lawnporn range available in retail outlets has become a priority.

What makes Lawnporn unique is that its followers are able to watch and learn, guided by Matt as he uses these products on his own home lawn, providing practical advice along the way to achieve the perfect lawn.

As we continue to grow, our mission still remains to help everyone who wants a good lawn.

Get your lawn on!!!

LAUNCH + 8-10-5 + KELP

PROFESSIONAL TURF FERTILISER FOR STRONG ROOT GROWTH

Launch+ is a professional grade foliar fertiliser designed to be applied to the foliage (or leaf) of the turf, a method of application which is often deemed the most efficient avoiding nutrient losses in the soil.

While designed for use throughout the year, Launch+ is best suited to use during times when turf root development is required.

The high amount of phosphorus (P), plant available zinc (Zn) and inclusion of kelp concentrate, all act to stimulate root growth. Ideal situations of use for Launch+ include during seed establishment, following renovation or scarrifying, or when recovery is required on injured or stressed turf.

GUARANTEED MINIMUM ANALYSIS

Nitrogen (N) as Urea	8%
Phosphorus (P) as Phosphite	10%
Potassium (K) as Carbonate	5%
Zinc (Zn) as Nitrate	1%
Kelp Concentrate	5%

GREEN LIGHT 15-0-0 + 6% Fe

PROFESSIONAL TURF FERTILISER FOR RAPID TURF COLOUR

Green Light is a professional foliar fertiliser designed specifically to encourage a deep green colour and growth response in turf. The inclusion of iron (Fe) in chelated form helps get the nutrient into the plant quickly, resulting in rapid and lasting greening effect.

Based on the same formulation as Australia's most widely used nitrogen (N) and iron (Fe) fertiliser, Green Light, in one form or another, is used regularly on some of Australia's most prominent golf courses and sporting facilities.

While Green Light is a solid all purpose fertiliser, typical uses for this product include tournament preparation in golf courses, and prior to televised games in sports facilities. On the home lawn, Green Light is ideal for use

GUARANTEED MINIMUM ANALYSIS

Nitrogen (N) as Stabilised Urea	15%
Iron (Fe) Total	6%
Iron (Fe) as Sulphate	4%
Iron (Fe) as EDTA Chelate	2%
Manganese (Mn) as Sulphate	2%

ROOT BUILDER +

TURF ROOT GROWTH HORMONE STIMULANT

Based on a highly concentrated kelp extract sourced from South Africa, the kelp formulation that makes up Lawnporn Root Builder+ is considered the Australian turf industry's best.

Many people have heard that some kelps contain plant hormones vital for growth, but what is less commonly known is that it is the ratio of these hormones within the kelp that encourage either leaf growth, or root growth. With a high auxin to cytokinin ratio (300:1), Lawnporn Root Builder+ is designed to stimulate root growth without impacting leaf growth.

When used in conjunction with fertilisers such as Launch+ or Green Light, there is no better way to get the turf roots moving.

MOIST

MULTI-PURPOSE PROFESSIONAL-GRADE SOIL WETTING AGENT

Growing a lush lawn in the driest inhabited continent on Earth, while using water responsibly can be challenging. That's why professional turf managers will rely on high quality wetting agent products like Lawnporn Moist to get them through spring and summer.

While its name sounds a little silly, Lawnporn Moist is a serious wetting agent. Made of a 100% blend of surfactant compounds, Moist is specifically balanced to provide multi-action wetting agent activity in the soil; improving water penetration, moisture retention and distribution within the soil, keeping precious water at the root zone for longer.

The result is a not only a more resilient lawn through a long, hot summer, but also a lawn that grows more evenly due to the elimination of wet and dry spots that cause varying growth rates.

FOUR SEASONS 25-0-13-3 + 3% Fe

PROFESSIONAL-GRADE SLOW RELEASE FERTILISER

Lawnporn Four Seasons is a professional grade slow release granular fertiliser. It is the style of fertiliser used by professional golf courses and sportsfield professionals designed to provide rapid and prolonged plant growth and greening effect. Slow release nitrogen and potassium will continue to feed the lawn for up to 16 weeks.

One of the most practical benefits of Lawnporn Four Seasons is the superior 150SGN granule size. The small size reduces the chance of fertiliser prills being damaged or picked up by mowing after application. Smaller granules provide better coverage over the turf surface when applied, offering superior performance.

GUARANTEED MINIMUM ANALYSIS

Nitrogen (N)	25.3%
as Urea	11.5%
as Nitrate	4.6%
as Polymer Coated Urea	5.6%
as Methylene Urea	3.6%
Potassium (K)	13.2%
as Nitrate	10.3%
as Controlled Release	2.9%
Sulphur (S) as Sulphate	3.6%
Iron (Fe) as Sulphate	3.0%
Biuret (maximum)	0.35%

CHARGER

7-0-7-3, 4% Fe, 2% Mn + Growth Promoters

PROFESSIONAL TURF FERTILISER AND GROWTH ENHANCER

Lawnporn Charger is specifically formulated to promote rapid lateral turfgrass growth as well as enhance colour. The unique blend of macro and minor nutrients and hormone growth promoters maximises the development potential of the turfgrass resulting in a more rapid establishment, grow in, or recovery from damage or renovation. Charger also maintains growth and colour of warm season grasses during cooler months. Chargers dual nitrogen source, plus iron and manganese in a plant available form allows for fast and effective uptake by the turf.

Charger is ideal to use when rapid recovery is required from incidence of plant stress, growth or renovation. It will also assist in the increase of colour in cooler periods of the year.

GUARANTEED MINIMUM ANALYSIS

Nitrogen (N) Total	7.2%
Nitrogen (N) as Urea	4.6%
Nitrogen (N) as Nitrate	4.6%
Potassium (K) as Nitrate	7.2%
Iron (Fe) as Sulphate	4%
Manganese (Mn) as Sulphate	2%
Zinc (Zn) as Nitrate	0.22%
Sulphur (S)	3.6%

INSTA-GREEN TURF PIGMENT

PROFESSIONAL TURF PIGMENT FOR A STADIUM QUALITY FINISH

Lawnporn Insta-Green is a premium turf colourant based on a unique blend of pigments, designed to improve turf colour and health. It contains natural green pigments which last for up to 8 weeks in periods of slow growth and does not appear artificial. The pigment and colour lock technology physically coats the leaf tissue and changes turf colour from a light yellow to dark green. This helps increase the solar radiation around the grass plant, which provides a healthier plant by increasing the photosynthetic and metabolic rate in transitional and dormant periods.

Mix according to the recommended dilution rates and apply when improved turf colour is desired such as during winter dormancy or drought, following a renovation or any time a boost in colour is required. Lawnporn Insta-Green can also be tank mixed with most herbicides or other plant protection products to improve application uniformity.
