

NOT FOR SISSIES!

Battleaxe PRO[®]

KILLS ANYTHING WITH 6 OR MORE LEGS.

BattleaxePRO[®] is an aerosol formulation containing both long lasting and vapour-acting knockdown components. It can be fitted with a nozzle extension to allow treatment of cracks and crevices.

The 'original' tool of choice by pest controllers across Australia, BattleaxePRO[®] is a professional product built with the things you'd expect - industrial 420 g bulk pack, a 360 degree valve allowing the pack to be sprayed at any angle, powerful 3 way mix of propoxur, tetramethrin and PBO, and extra long extension tube gives you the ultimate 'pest control in a can'.

The versatile 'great all rounder'. Get your hands on it today.

BattleaxePRO Professional Crack and Crevice Aerosol

BED BUG registration!

BattleaxePRO® Aerosol - the original tool of choice.

BattleaxePRO® Aerosol has a number of advantages over conventionally packaged insecticides. These include efficiency, convenience, and less waste with no need to dilute ingredients. This is the superior aerosol product-of-choice.

Ideal for detection

Cockroach infestations are not always obvious during the day, and BattleaxePRO® with its long extension tube is ideal for detecting and flushing out infestations.

Crack and Crevice

BattleaxePRO® gives long residual action and allows the operator to treat surfaces within cracks and crevices where significant contact with the insects is more likely to occur.

BattleaxePRO® is the first choice in detection and control of cockroaches and other public health pests.

BattleaxePRO® Aerosol Features:

- Best flushing action on the market
- Fastest knockdown
- Residual activity
- Penetrating vapour action
- Flexible nozzle extension for crack and crevice treatment
- 360 degree valve - aerosol operates at all angles - even upside down
- Convenient to use in difficult areas
- Large industrial size 420 g pack
- Proven powerful three way mix of 20 g/kg propoxur, 2g/kg tetramethrin, and 10 g/kg PBO
- Controls bed bugs, ants, spiders, flies, mosquitoes, silverfish, clothes moths, carpet beetles, cockroaches, millipedes, earwigs, slaters, and European wasps.

Indications:

Especially effective for the detection and control of cockroaches and European wasps, BattleaxePRO® has a reputation as the best in market.

Clean - leaves no oily residue on merchandise, machinery, counters, furnishings, etc.

Registered for the control of cockroaches, mosquitoes, carpet beetles, clothes moths, flies, silverfish, ants, bed bugs, earwigs, spiders, millipedes, slaters and European wasps.

Quick knockdown, fast killing performance, with strong flushing action.

Value pack 420 gram size.

Extra long extension tube to allow easy and effective crack and crevice application.

Low poison schedule. Can be used in houses, restaurants, hotels, ships, factories, etc.

Handy lightweight, disposable container.

Special spray valve that gives uninterrupted flow.

CAN BE OPERATED AT ANY ANGLE! Special 360 degree valve.

Long residual activity.

New 'Blue Spirit' fragrance.

Toxicology

BattleaxePRO® Aerosol is placed in Schedule 5 of the Poisons Schedule and carries a CAUTION label. The active ingredients are rapidly metabolised and excreted from mammalian systems and cholinesterase levels rapidly return to normal.

BattleaxePRO® Aerosol, sprays at any angle. The can is fitted with a special 360 degree valve that allows the pack to be used at any angle giving the pest controller access to every nook and cranny that pest could be hiding in.

BattleaxePRO® Aerosol has a unique valve that allows the continuous flow of spray at any angle - thus increasing the flexibility of use for pest management professionals. Getting into those tight corners and places in and around shelving has never been easier. Don't settle for inferior products that aren't designed for pest managers.

It's okay to spray

BattleaxePRO® utilises the latest in propellant technology and is CFC (chlorofluorocarbon) free. You can spray with

confidence knowing BattleaxePRO® is not negatively impacting on the environment or negatively affecting the ozone.

Extra long, Custom Extruded Extension Nozzle

BattleaxePRO® features a custom extruded extension nozzle to provide optimum spray dispersion where and when you need it. A large bore internal diameter of the extension tube prevents spluttering and 'water pistol spray effects'. The custom extruded extension nozzle on BattleaxePRO® provides an even dispersion of insecticidal droplets into the treated void or area. This gives BattleaxePRO® the superior vapour and flushing action for your successful pest service treatment.

420 g Value Pack

BattleaxePRO® Aerosol comes in a 420 g industrial size pack presenting great value to the end user.

The One, The Only.

Don't be sold short on smaller packs, products that 'stink' long after being sprayed, or packs that don't have 360 degree valves. Get value for dollar with BattleaxePRO® today.
