

Application Information

FertiCote blends are used at planting and side-dressing as the base source of nutrition. FertiCote blends contain HAIFA MultiCote Technology to release nutrients in line with crop demands.

■ FertiCote ■ Straight Fertiliser

Important Information

- Do not exceed recommended application rates as this can be harmful to plants.
- Do not swallow. The dust from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin.

For more information or product support, please seek advice from your local distributor.

FertiCote®

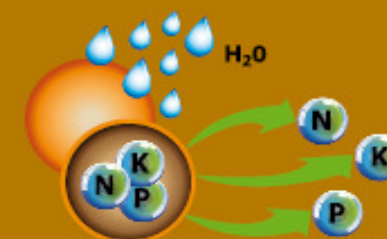

Fertiliser

FertiCote Fertiliser

NPK 10-3-18 + Mg + TE
(8 month)

The FertiCote range of quality products is specifically formulated to release nutrients at a controlled rate to match a crops demand. Water vapor penetrates the FertiCote molecule, allowing the nutrient content to be diffused into the soil at a rate dependent on temperature.

FertiCote Fertiliser

Quality Ingredients

The FertiCote range of products contain a blend of upfront and controlled release fertilisers. Premium quality controlled release MultiCote products from Haifa are used.

FertiCote Custom Blending

FertiCote products can be custom blended to a wide range of formulations. Speak to your distributor about creating a blend. All FertiCote products are blended in Australia.
