

Paton's No.17 Lawn Food is a proven lawn fertiliser formulation which contains essential nutrients for the healthy growth of lawns.

Paton's No.17 Lawn Food contains a fast greening formula and promotes lawn growth and development. Potassium content is derived from sulphate to reduce salt accumulation in soil. The product can be used as a starter fertiliser prior to sowing or laying of turf and as a general purpose maintenance fertiliser.

Regular feeding with Paton's No.17 Lawn Food will also assist root growth, increasing drought and cold tolerance and enable the plant to recover more quickly from periodic setbacks.

Benefits

- Suitable for all grass types including couch, kikuyu, buffalo, tall fescue, ryegrass and bluegrass
- Fast response in 7-10 days
- Nutrient formulation promotes strong root and shoot growth

Product Analysis

Elements	Percentage
Nitrogen (N) Total	10.3%
Phosphorus (P) Total	3.1%
Potassium (K) Total as sulphate	4.6%
Sulphur (S) Total as sulphate	16.3%
Calcium (Ca) Total	6.3%
Iron (Fe) Total as sulphate	0.5%

Directions for application

Prior to seeding or laying turf, broadcast the required amount of fertiliser onto the soil surface and rake into the soil to a depth of approx 5cm (2 inches) and water in well. On established lawn areas, broadcast evenly over the area at the desired rate and water in well.

Crop	Rate	Comments
New lawns, planting runners and laying turf	50g per m ²	Reapply 6-8 weeks later at 25g per m ² . Water in well after application.
Established lawns	30-50g per m ²	Apply at least 3 times per year during early spring, summer and autumn. Water in well after application.

Pack Sizes: Available in 20kg Bags
