

### Phosphoric Acid Acidifying Agent

Active Constituent: 85 % Phosphoric Acid (45% Phosphate w/v)

A high strength acidifying agent that can be used in various water treatment situations to effectively reduce water pH and alkalinity. Phosphoric acid can be used as a cleansing treatment to effectively dissolve and remove mineral deposits in irrigation lines and fertigation/drip systems to restore water flow efficiency. Phosphoric acid can also be used as a liquid fertiliser to supply plant available phosphate

### Benefits

- Quickly and effectively reduces water pH and alkalinity
- Dissolves mineral deposits in many situations including build ups in irrigation lines
- Maintains water pressure and flow uniformity in drip irrigation systems
- As a soil application, supplies readily plant available phosphate to crops

### Pack Sizes:

Available in 10 L pack

### Product Characteristics

Colour	Specific Gravity
Clear	1.69

Maintains Irrigation Pressure Uniformity

Dissolves Calcium Build Up

### Directions for Application:

Crop	Rate	Comments
Acid Treatment - Trickle/Irrigation lines (to remove calcium, magnesium carbonates as well as iron and manganese deposits)	0.6 %	Run treated water through irrigation system maintaining a dilution of 0.6% phosphoric acid (or a pH between 2.55). Turn pump off when line is full and let sit for 2-6 hours then flush with clean water.
As Liquid Phosphate Fertiliser	5 - 15 L/ha	This product contains 45% phosphate w/v. Soil apply required units of phosphate.
