

### Scuttle Roach Gel

Active Constituent: 20 g/kg Hydramethylnon

A ready to use gel formulation for the control of cockroaches in domestic, commercial and warehousing premises.

Scuttle Roach Gel may be used as a spot or crack and crevice treatment for the control of cockroaches in and around homes, institutional, warehousing and commercial establishments, including hospitals, laboratories, computer facilities, sewers, buses and other transport vehicles or vessels, pet shops and zoos. Scuttle Roach Gel comes in a handy ready to use 30 gram syringe

### Benefits

- Easy and safe to apply with the syringe applicator
- Effectively reduces cockroach populations within 7 days
- No odour
- Extremely attractive gel formulation results in high cockroach mortality rate
- Long lasting formulation that remains stable till eaten

**Pack Sizes:** Available in 30 gram syringe pack

### Application Restraints:

- DO NOT place gel in areas that are regularly washed as this will remove bait
- DO NOT use in areas accessible to children and pets
- DO NOT use near open food and food contact surfaces
- DO NOT use this product on or around electrical equipment due to the possibility of electrical shock
- DO NOT apply gel to areas which have been recently sprayed with insecticides, or spray insecticides over gel placements, as this may cause the gel to become repellent
- DO NOT apply to surfaces where the temperature exceeds 54o C

### Directions for Use:

Cockroach Species	Rate	Method	Comments
German	0.25 - 0.50	Small Spots	Use the lower application rate for low to moderate
Large, such as Australian, American, Smoky brown or Oriental	0.5 - 1.0	Large Spots	infestations and the higher rate for more severe infestations
