DIRECTIONS FOR USE

Restraints

DO NOT spray in hot weather.

DO NOT apply 21 days before or after an oil spray.

DO NOT mix with an oil spray.

Situation	Pest	State	Rate per 100 L water	Critical Comments
Vegetables (not cucumbers or rockmelons)	Powdery Mildew, Rust, Tomato Russet Mite, Bean Spider Mite, Two Spotted Mite	SA, WA, VIC, TAS only	200 to 300g	Apply when pest or disease is first seen and repeat as necessary. Use the higher rate in crops with a large leaf cover or when conditions favour disease or mite development.
	Powdery Mildew, Rust, Two Spotted Mite	QLD only	350g	
	Powdery Mildew, Rust, Tomato Russet Mite, Bean Spider Mite.	NSW only	200g	
Ornamentals	Powdery Mildew, Two Spotted Mite	VIC, TAS, SA, WA only	200g	Apply when pest or disease is first seen and repeat as necessary.
		QLD only	350g	
	Powdery Mildew	NSW only	200g	

marked and set up for this purpose clear of waterways, desirable vegetation and tree roots.

Empty containers and product should not be burnt.

FIRST AID:

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126.

MATERIAL SAFETY DATA SHEET:

Additional information is listed on the Material Safety Data Sheet available from Barmac Pty. Ltd or at our internet site www.barmac.com.au

NOTICE: This product is designed only for the particular purposes indicated on the label. Failure to use the product strictly as directed may be illegal, prove dangerous and render the product ineffective. The buyer or user is responsible for any misuse or negligence in the handling, storage, use of or disposal of this material. Barmac Pty Ltd will not accept any responsibility whatsoever and howsoever arising and whether for consequential loss or otherwise in connection with the supply and use of this product other than those responsibilities mandatorily imposed by Statutes applicable to the sale and supply of these goods.

PROTECTION OF WILDLIFE, FISH, CRUSTACEA AND ENVIRONMENT:

Toxic to fish. Do not contaminate streams, rivers or waterways with the chemical or used containers.

PROTECTION OF CROPS, NATIVE AND NON TARGET PLANTS:

Do not apply under meteorological conditions or from spraying equipment which could be expected to cause spray to drift onto nearby susceptible plants, adjacent crops, crop lands or pastures.

STORAGE AND DISPOSAL: KEEP OUT OF REACH OF CHILDREN.

Store in the closed original container in a cool, well-ventilated area. Do not store for prolonged periods in direct sunlight. Store in a locked room or place away from children, animals, food, feedstuffs, seed and fertilisers.

Plastic Containers

Triple or (preferably) pressure rinse containers before disposal. Add rinsings to the spray tank. DO NOT dispose of undiluted chemicals on site. If recycling replace cap and return clean container to designated collection point. If not recycling break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots.

Paper or Cardboard Bags or Boxes

Puncture, shred and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots.

Plastic Bags

Single rinse bags before disposal. Add rinsings to spray tank. Puncture, shred and bury empty bags in a local authority landfill. If no landfill is available, bury the bags below 500 mm in a disposal pit specifically

Citrus	Citrus Rust Mite, Citrus Bud Mite	NSW, WA, QLD, VIC & SA only	200 to 300g	Spray July to August with thorough coverage. Do not use on citrus in hot weather or within 21 days of an oil spray. Use the higher rate for heavy infestations.
	Citrus Bud Mite	TAS only	200 to 300g	Use the higher rate for heavy infestations.
White Louse Scale	NSW only	200 to 300g	May be added to copper spray at petal fall or applied separately during spring or autumn. Do not use on citrus in hot weather or within 21 days of an oil spray. Use the higher rate for heavy infestations.	
	NSW, VIC, TAS, SA & WA only	200 to 300g	Apply at 2-4 weekly intervals depending on the incidence of pest or disease. Use the higher rate for heavy incidence of infestation.	
Grapes	Grapeleaf Blister Mite	NSW, VIC, TAS, SA & WA only	200 to 300g	Apply at 2-4 weekly intervals depending on the incidence of pest or disease. Use the higher rate for heavy incidence of infestation.
	Vine Mite	QLD only	350g	Apply when shoots are 20-25 cm long and repeat at intervals of 10-14 days during humid weather. Use the higher rate early in the season before temperatures rise.
Powdery Mildew	NSW, VIC, SA, WA & TAS only	200 to 300g	200 to 300g	QLD only
	QLD only	350g		

Situation	Pest	State	Rate per 100 L water	Critical Comments
Stone Fruit (except apricots)	Rust	NSW, VIC, SA, WA, & TAS only	200 to 300g	Apply about 4 weeks after petal fall. Use the higher rate when conditions favour disease development.
		QLD only	350g	Apply at petal fall and then at intervals of 3-4 weeks until mid-late January.
	Brown Rot	NSW, VIC, TAS & SA only	200g	Apply 4 weeks after petal fall then as cover sprays.
		QLD only	350g	Apply at petal fall only.
Pome Fruit	Powdery Mildew	NSW, VIC, TAS, SA & WA only	200 to 300g	Apply at pink bud, petal fall and then at intervals of 2-3 weeks. Use the lower rate if weather is hot and spraying non sensitive varieties. Do not use on sulphur sensitive apple and pear varieties in hot weather. Also suppresses mite activity.
		QLD only	350g	
	Black Spot (Scab)	VIC, TAS & SA only	200g	
		QLD only	350g

GENERAL INSTRUCTIONS

MIXING:

- MECHANICAL VAT AGITATOR: This product can be put straight into the vat with the agitator running.
- BY-PASS VAT AGITATOR: Premix this product with water in a bucket to form a cream before adding to the water in the vat with the agitator running.

FUNGICIDE RESISTANCE WARNING:

GROUP Y FUNGICIDE

For fungicide resistance management Barmac Wettable Sulphur Fungicide & Miticide is a Group Y fungicide. Some naturally occurring individual fungi resistant to Barmac Wettable Sulphur Fungicide & Miticide and other Group Y fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungi population if these fungicides are used repeatedly. These resistant fungi will not be controlled by Barmac Wettable Sulphur Fungicide & Miticide and other Group Y fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Barmac Pty Ltd accepts no liability for any losses that may result from the failure of Barmac Wettable Sulphur Fungicide & Miticide to control resistant fungi.
