

APPLICATION HINTS:

Apply to the drip zone of the plant and lightly work into the soil surface or cover with a good organic mulch. Be careful not to damage fine shallow surface roots as this may render them prone to fungal attack and fertiliser burn. Apply sparingly on potted plants as excessive fertiliser could cause burning relatively easily. It is much safer to apply small amounts on a regular basis.

IMPORTANT THINGS TO REMEMBER:

- Always water fertiliser well immediately after application. Watering should result in a thorough saturation of the area
- Avoid direct contact with plant roots, seeds etc
- Even, light and regular applications of this quality product will achieve the best results
- Always reseal bags after use and dispose of empty containers properly
- Sandy soils will require lower rates of fertiliser but more frequent applications
- Do not exceed the recommended application rates as this can be harmful to plants.

CAUTION: All fertilisers should be used with care. Wear gloves and protect eyes from dust.

WARNING: Use of this product may result in Cadmium and Mercury residues in excess of the Maximum Permissible Concentration (MPC) in plant and animal products and may result in any accumulation of these residues in soils.

FRUIT AND FLOWERING FOOD

Fruit and Flowering Food

- Formulated for promoting strong healthy growth with healthy blooms and fruit.
- Suitable for all fruit trees and flowering plants.

FRUIT AND FLOWERING FOOD

Fruit and Flowering Food

PRODUCT ANALYSIS:

Nitrogen as Ammonium	6.4%
Nitrogen as Organic	1.6%
Total Nitrogen	8.0%
Phosphorus as Water soluble	2.1%
Phosphorus as citrate soluble	0.7%
Phosphorus as citrate insoluble	0.2%
Total Phosphorus	3.1%
Total Potassium as Sulphate	8.4%
Total Sulphur as Sulphate	13.5%
Total Calcium	4.0%
Total Magnesium as sulphate Plus Iron	0.5%

Paton's Fruit and Flowering Food is an organically based blend that has been formulated to meet the specific requirements of a wide range of fruit trees and flowering plants. It contains a complete range of essential nutrients including Potassium which is essential for fruit and flower development.

SUITABLE FOR:

Paton's Fruit and Flowering Food is suitable for a wide range of plants including:

- Citrus trees
- Stone fruit
- Roses
- Other flowering plants

HOW MUCH DO YOU NEED:

SMALL PLANTS: Apply 50-75 grams per square metre, 3 or 4 times each year. Feeding during the months of August, October, December and March will give the best results.

LARGE PLANTS: Apply 100-150 grams per square metre, 3 or 4 times each year. Feeding during the months of August, October, December and March will give the best results.

In sandy soils use less, approximately half, the applications above but feed more regularly. This will prevent excess nutrients leaching into the environment and provide more nutrients to the plant.
