

APPLICATION HINTS:

SHRUBS AND TREES: Apply to the drip zone of the plant and lightly work into the soil surface or cover with a good organic mulch. Be careful not to damage fine shallow surface roots as this may render them prone to fungal attack and fertiliser burn.

IMPORTANT THINGS TO REMEMBER:

- Always water fertiliser well immediately after application. Watering should result in a thorough saturation of the area
- Avoid direct contact with plant roots, seeds etc
- Even, light and regular applications of this quality product will achieve the best results
- Always reseal bags after use and dispose of empty containers properly
- Sandy soils will require lower rates of fertiliser but more frequent applications
- Do not exceed the recommended application rates as this can be harmful to plants.

CAUTION: All fertilisers should be used with care. Wear gloves and protect eyes from splashing.

WARNING: Use of this product may result in cadmium residues in excess of the Maximum Permissible Concentration (MPC) in plant and animal products and may result in accumulation of these residues in soils.

MULTIPURPOSE FERTILISER

Multipurpose Fertiliser

Wherever we go, we make it grow.

- Promotes plant growth fruit and flower development.
- Specially formulated general purpose fertiliser.

MULTIPURPOSE FERTILISER

Multipurpose Fertiliser

PRODUCT ANALYSIS:

Nitrogen as ammonium	10.5%
Phosphorus as water soluble	3.0%
Phosphorus as citrate soluble	0.5%
Total Phosphorus	3.5%
Total potassium as chloride	5.7%
Total sulphur as sulphate	7.0%
Total calcium as superphosphate	4.6%

Paton's Multipurpose Fertiliser is a general purpose fertiliser formulated to provide a balanced range of nutrients. It contains all the major plant nutrients and also contains Calcium, an important secondary element.

SUITABLE FOR:

Paton's Multipurpose Fertiliser is suitable for vegetables and fruits but can also be used for general application to lawns, shrubs and flowers. Multipurpose Fertiliser promotes vigorous and healthy growth in most plants.

HOW MUCH DO YOU NEED:

VEGETABLES: Apply 50 grams per square metre at planting. Work well into soil. Thereafter apply 25g per square metre every 4 weeks. Water in well.

FLOWERS AND BULBS: Apply 50 grams per square metre at planting. Work well into the soil. Apply 25 grams per square metre prior to bud formation.

SHRUBS AND TREES: At planting apply 50 grams per square metre within and around the planting hole. Work well into the soil. Side dress 100g/5cm of trunk diameter (measured at ground level). Spread under the drip zone, but not in contact with the trunk. Apply in early Spring and early Autumn.

LAWNS: Prior to sowing apply 50 grams per square metre. Top dress with Paton's No 17 Lawn Food or Paton's No 17 Lawn Food Plus every 8 weeks.
