## CROAKED Cane Toad Control

*Analysis: 112g/L Eugenol*

Croaked cane toad control uses an anaesthetic formulation for the control of cane toads, causes no pain or suffering to the toad. Croaked is in a ready-to-use trigger pack with a formulation using food-grade ingredients, containing the active ingredient, Eugenol (an extract of clove bud).

Amgrow Croaked Cane Toad Control has been developed in association with AQUI-S New Zealand Ltd a company specialising in the manufacture and development of aquatic anaesthetic (Eugenol) for aquaculture. The modified formulation of Eugenol has been found to be ideal for sedating and euthanasing cane toads, the first commercial humane method in Australia.

### Benefits:

- Economical - one trigger pack treats up to 150 cane toads.
- Rapid immobilisation with just 1 spray.
- Quick kill in less than 8 minutes.
- Quick retrieval of cane toad bodies is convenient and limits secondary poisoning.
- Sedation mode of action.
- Safe to use around pets - follow directions for use on pack.

### How to use:

- For outdoor use only.
- Wear gloves when using product or handling toads.
- Shake well before use.
- Hold sprayer 20-30cm from the toad and squirt trigger once for small toads and twice for larger toads (ensure spray contacts toads).
- Generally the toads will not react to the spray, it does not irritate and acts as a sedative.
- Observe toads for a period of 1-2 minutes.
- If toads are still moving after 1-2 minutes, they may require further treatment.

### Cautions:

- DO NOT spray directly on humans, pets, exposed foods, water, food preparation areas or food utensils.
- DANGEROUS TO FISH. DO NOT spray on, or within 1 metre of fishponds or waterways, particularly under windy conditions, to avoid contamination from spray drift. Toxic to aquatic life.
- DO NOT allow chemical containers or spray to get into drains, sewers, streams or ponds.
- DO NOT use this container for any other purpose.
