

Lawnporn History

Lawnporn Insta-Green Turf Pigment is a turf colourant designed for application to sporting stadiums, greens and tees and the lawn of the home enthusiast. This pigment product enables turf managers to check for uniform application of chemicals, and provides the additional benefit of natural green colour lasting 1-2 weeks. Insta-green Turf Pigment is the new turf colourant that contains natural green pigments which lasts for weeks in periods of slow growth and does not appear artificial. Insta-Green Turf Pigment will create an instant healthy looking sward. When applied as per label instructions, the pigment coats the leaf tissue and changes turf colour from a light yellow to a dark green. By applying Insta-Green Turf Pigment in the autumn, winter and spring the reflectance of light decreases helping increase the solar radiation around the grass plant. Resulting in a healthier plant by increasing the photosynthetic and metabolic rate in transitional and dormant periods. Insta-Green Turf Pigment is resistant to adverse effects of prolonged UV light exposure.

Key Features

- Long lasting natural green colour for a stadium quality finish
- Improve turf colouring during dormancy or after renovation
- Tank mix with herbicides to improve application accuracy
- Unique pigment based formulation, compatible with pesticides
- Resistant to adverse effects of prolonged UV light exposure
- Perfect for sporting stadiums, greens and tees and the home enthusiast

Directions for use

Lawnporn Insta-Green is a premium turf colourant based on a unique blend of pigments, designed to improve turf colour and health. Mix according to the recommended dilution rates and apply when improved turf colour is desired such as during winter dormancy or drought, following renovation or any time a boost in colour is required. Lawnporn Insta-Green can also be tank mixed with most herbicides or other plant protection products to improve application uniformity. DO NOT spray on concrete, masonry or other porous surfaces as this product may stain. Additional over spray may be removed by water rinse prior to drying.

Situation	Rate	Comments
Turf lawns of all varieties, when colour enhancement is required.	Pressure sprayer - 100mL/100m2 Watering can - 20mL/10L water	Apply with a hand sprayer in a minimum of 5L water per 100m2. Repeat as required but allow a minimum of 14 days between treatments.
