BARMAC

# SureFlow Copper Sulphate

Trace Element

## Directions of use:

<i>Crop</i>	<i>Application</i>	<i>Rates</i>	<i>Comments</i>
General rate	Foliar	200-500g/100L	Apply in sufficient water to wet foliage. Apply in early crop life.
Fruit trees	Soil	5-10kg/ha	Apply when deficiency symptoms are first noticed.
Vegetables		25-50kg/ha	Incorporate into soil prior to planting.
Turf	Soil	25-50g/100m <sup>2</sup>	Apply at commencement of season.

Note: Copper can be toxic when levels become too high. A leaf or soil test should be conducted to determine exact requirements necessary for optimum plant growth.

## Notice:

This product is designed only for the particular purposes indicated on the label. Failure to use the product strictly as directed may be illegal, prove dangerous and render the product ineffective. The buyer or user is responsible for any misuse or negligence in the handling, storage, use of or disposal of this material. Amgrow Specialty Agriculture will not accept any responsibility whatsoever and howsoever arising whether for consequential loss or otherwise in connection with the supply and use of this product other than those responsibilities mandatorily imposed by Statutes applicable to the sale and supply of these goods.
